ABSTRACTED-PUB-NO: SU 1499144A

BASIC-ABSTRACT:

The test stand includes a rolling drum (1) within which is the examined wheeled vehicle (2) mounted on support rollers (3,4) kinematically joined to a drive-braking device (balancing electrical machine (8)). During angular vibrations of the vehicle (2), a dust pumping machine together with a shield (18) are also moved to give uniform concentration of dust over the whole volume of the rolling drum (1). USE/ADVANTAGE - Life testing of wheeled vehicles, i.e. tractors. Better accuracy in reproducing working conditions.
